

Altermind Smart Search Engine Technology

At Altermind, we believe technology can help us build a modern consultancy that meets its clients need always better. With AI specialists from MIT, Stanford University and the Toulouse School of Economics, we have developed an internal algorithmic tool that is capable of finding and ranking the best specialists in the world, among a constantly updated database of more than 13 million authors and nearly 20 million publications in AI, economics and strategy. ASSET is unique and reinforces our efficiency to fulfil our mission: find creative and high-level solutions to our clients' issues

1

A new mission is coming in

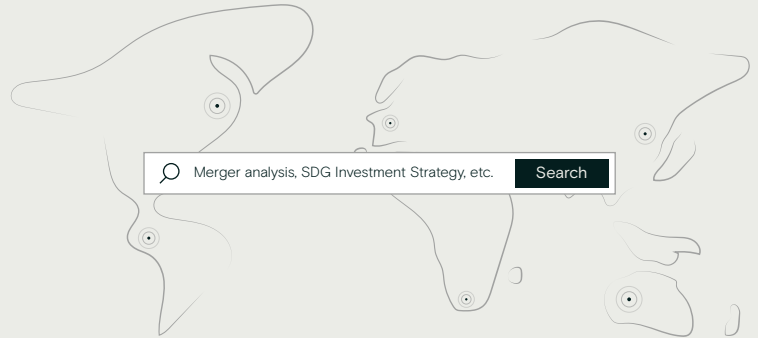

New mission

with a specific expertise needed

2

We search one or many expert(s) from **all around the world** to work with our team of consultants and our network of 300 close and regular experts to answer our client's needs

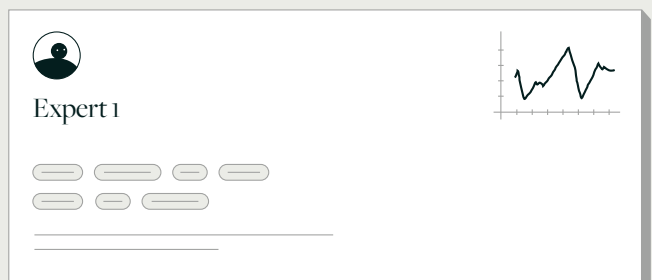

3

We select one or many expert(s) from the list offered by ASSET, our search engine technology

4

We examine her/his/their profile **in details** and analyze her/his/their academic work and publications

Expert 1

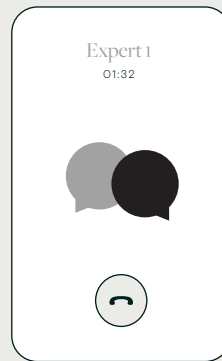

5

We have a short first contact with the expert(s)

6

In case of mutual interest, we call him/her/them to get into details of the mission after signing a NDA

7

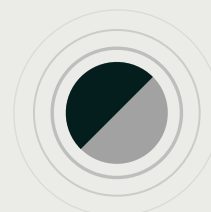

Subject to the client's approval, the expert(s) is(are) onboarded on the mission and join(s) our ad hoc and smart team to provide the best solutions

Joining our team!

8

Our ad hoc team can now work on an innovative and powerful solution for our client

Solution!
